

Summary Check List

Introduction to Microbiology Module 1

Before Class

- Read the Learning Guide for Module #1.
- Be familiar with syllabus, Learn Management System (Blackboard), and the modular system.
- Use the reading outline to master key terminology and concepts presented in text.

First Day of Module

- Read the Learning Guide for Module #1, if not done so already.
- Become familiar with learning resources linked within Blackboard, the Learning Management System (LMS).

During Class

- Understand the syllabus and the course structure.
- Describe relationships between posthumous environmental changes and changes in microflora.
- Discuss other topics on the reading outline as time permits.

After Class

- Continue to master key terminology and key concepts presented in reading and during class.
- Take exam during normal hours of operation of the testing center.
